The Matrix Contract for the Polygon Pol Chain

POL FORCE

- X3 Matrix = Infinite Earning potential with 9 increasing POL Value Levels!
- X 6Matrix = Another 9 Levels of Infinite Earning Potentials with further spillover potentials!
- ~Dividends = 60% dividends from every payment into the system is distributed to every player in the
- game! ~ Faster, easier and P2p pro smart contract

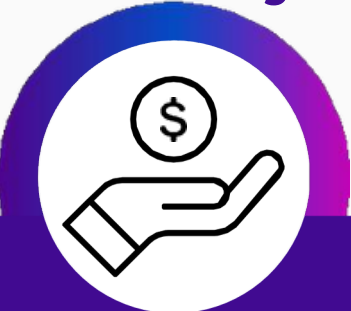

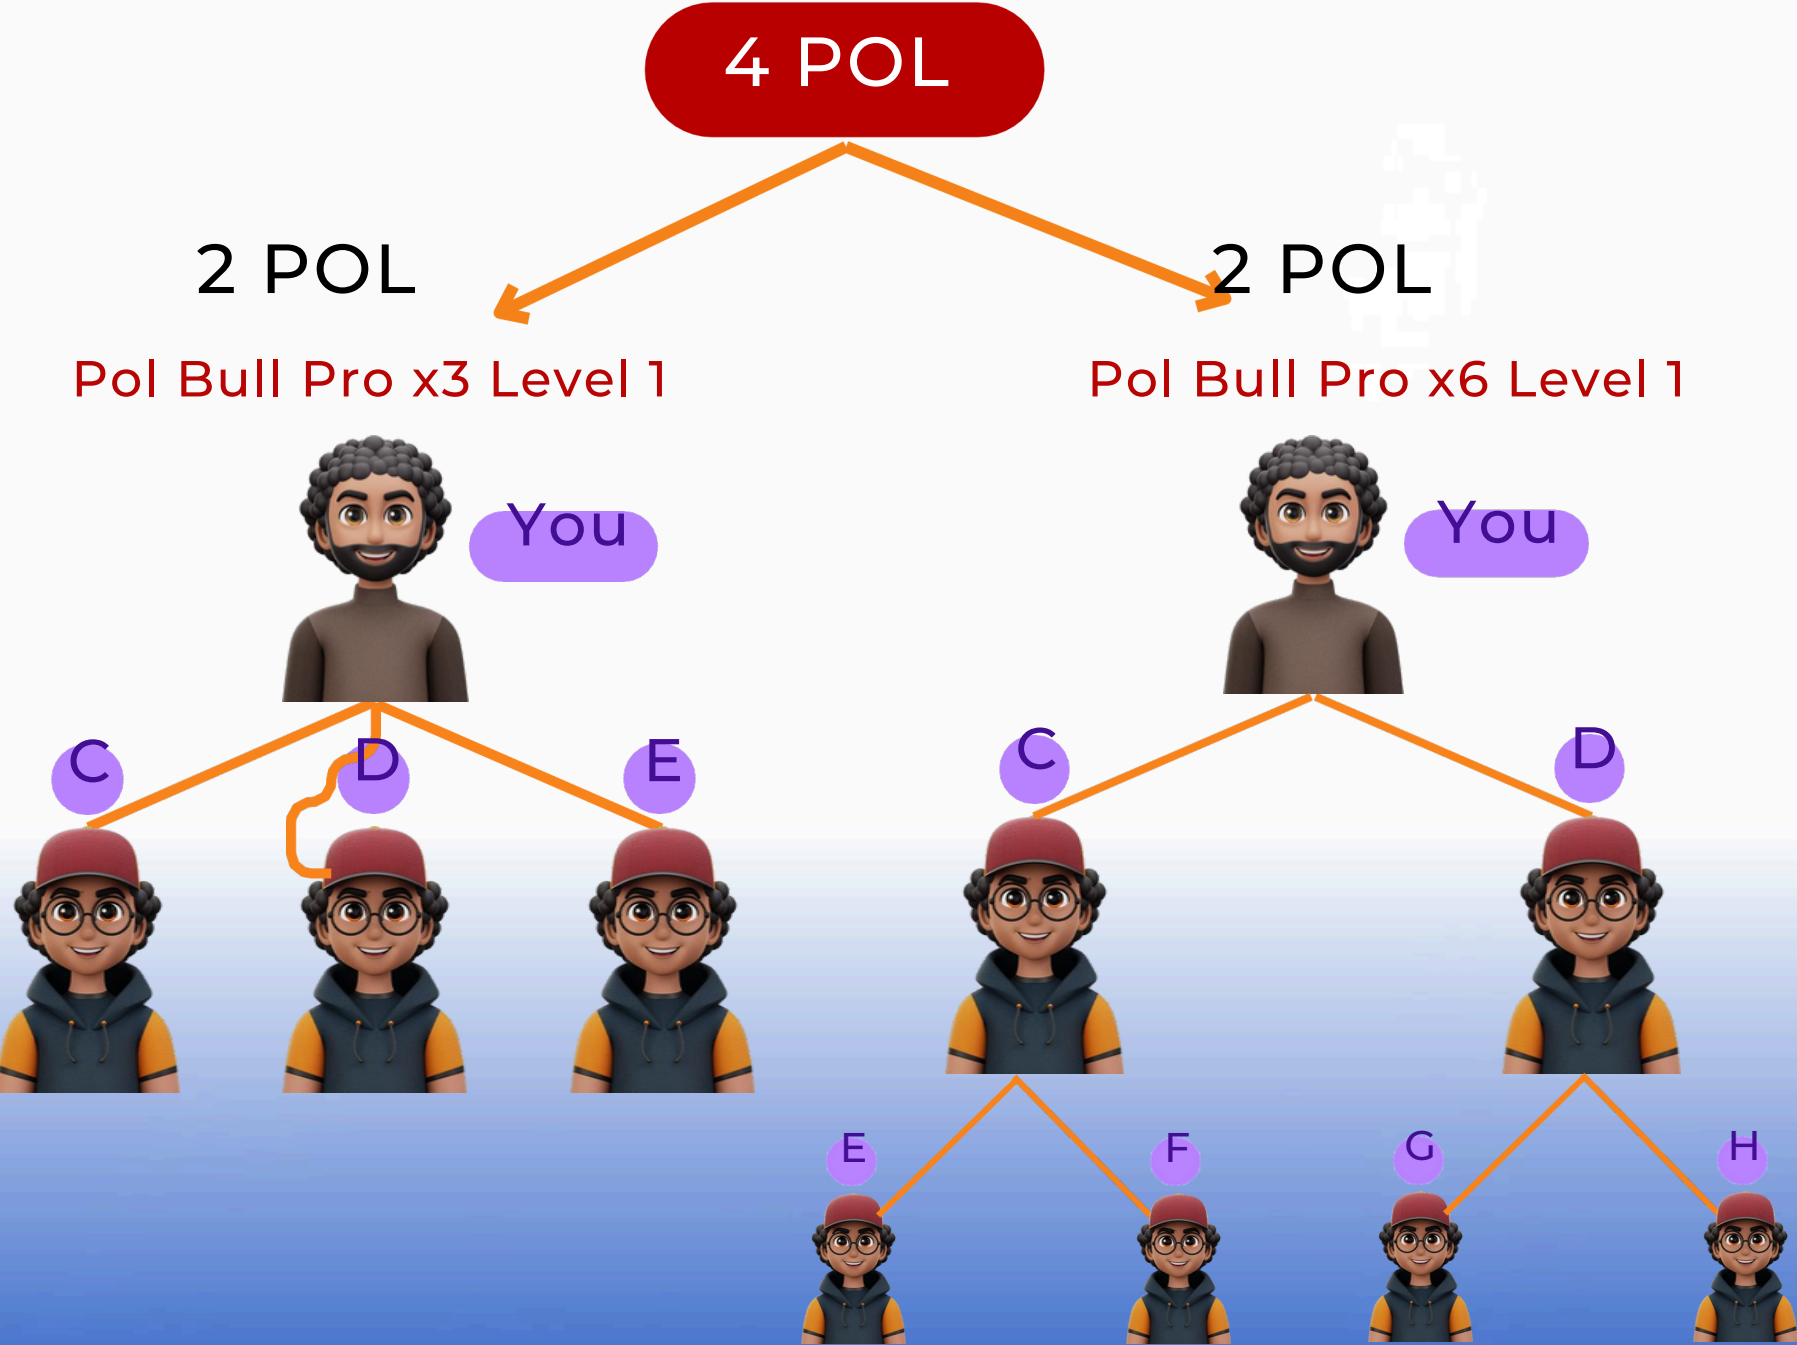

60% DIVIDENDS INCOME

Game Mechanics

There are 2 Matrix systems with in Pol Force . you auto-join both when you first enter the game.

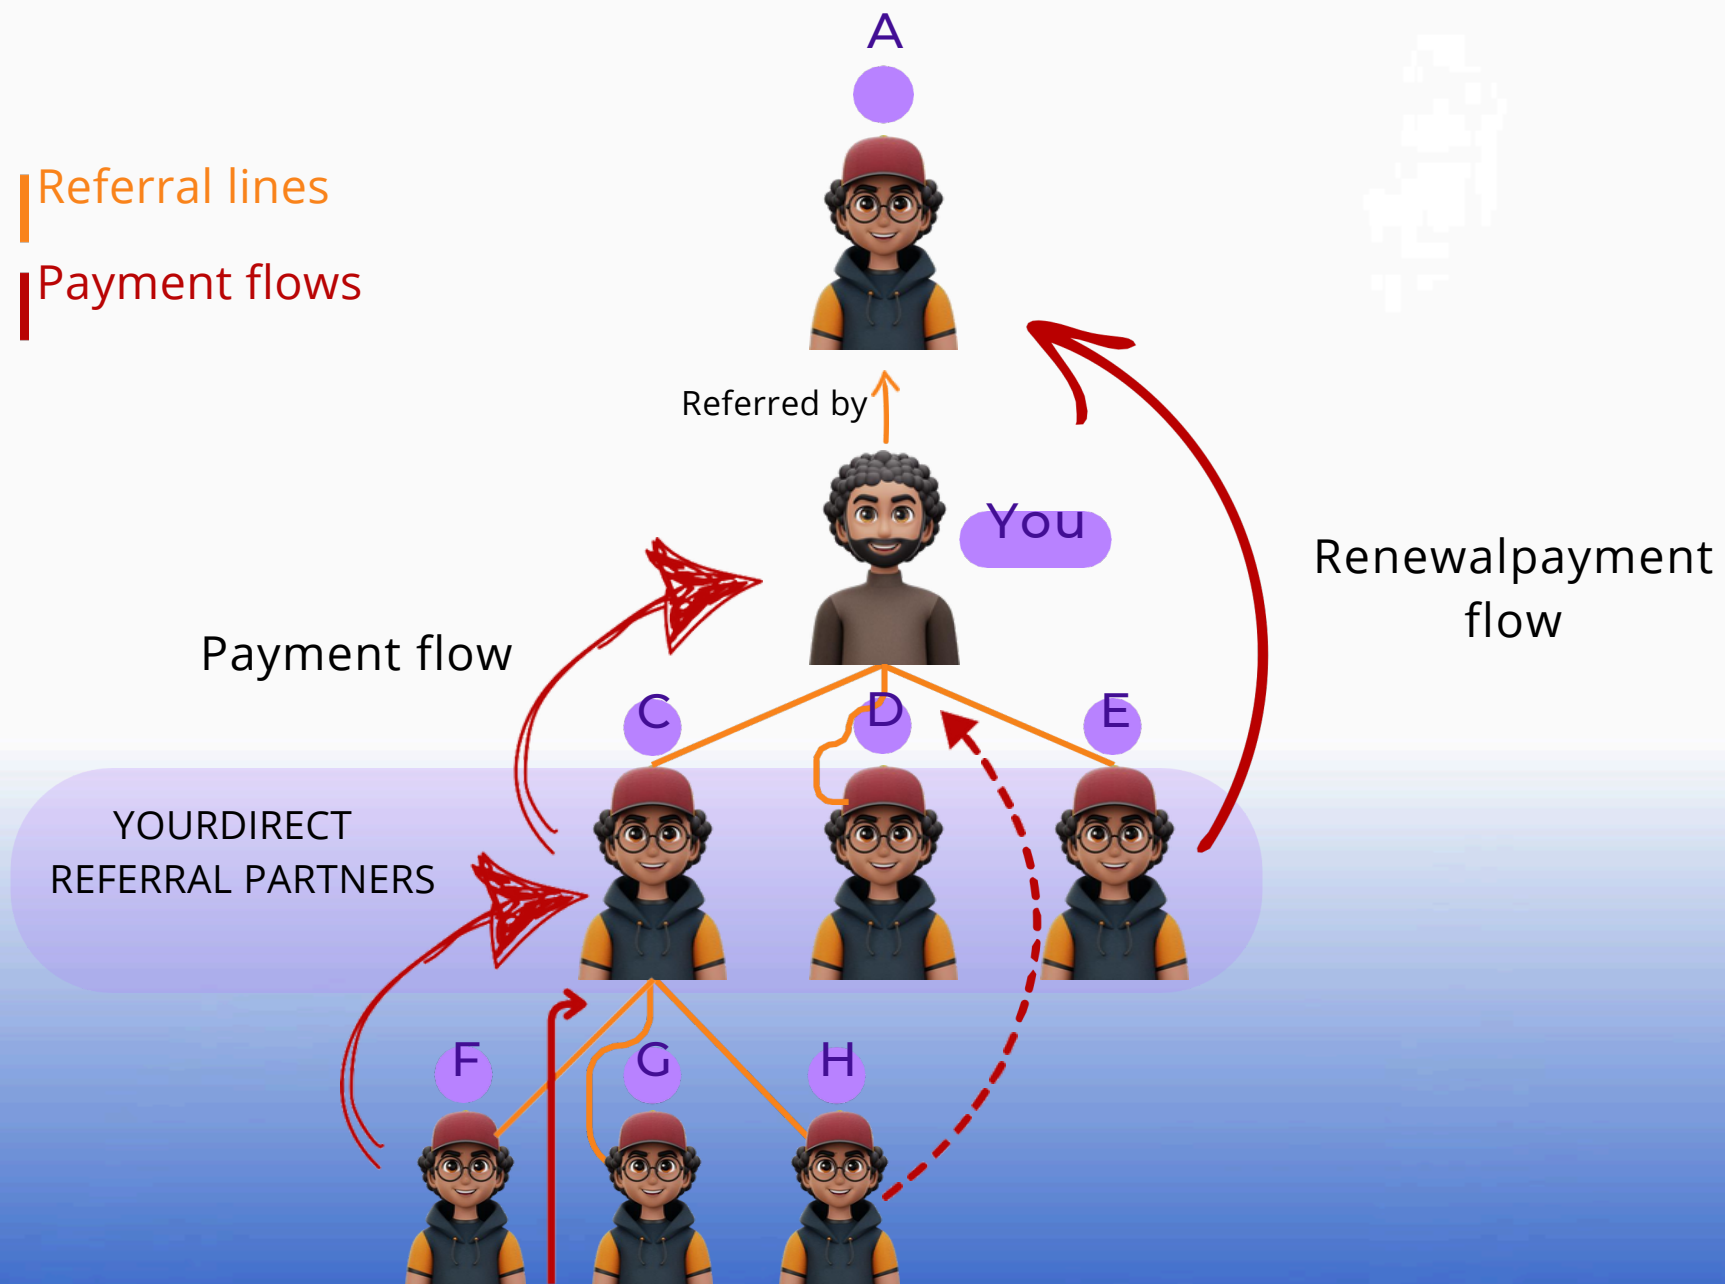

The entry cost level 1 matrix = Total Registration cost of just 4 P O L

- Below each Matrix you have anumber of partners which pay POL direct into your wallet (P2P). ~Each Matrix has 9 levels (9 in x3 and 8 in x6) -each twice the price of the previous level, you buy into each level in sequence - with each one earning you double the money!
- ~There are no time outs or expiry on any level! ~Each levelso have auto-renewal systems built in! ~ Over flow payments and auto-referral sare baked right into POL FORCE! ~What's more - every single player willearn dividends from the game!
- ~A 60% dividend fee is taken from every play and place din to the dividend pool. This is distributed to all players!

Game Mechanics - POL FORCE X3

Pol Force x3 has 9 Levels, each level is twice the price of the previous. Each level has 3 Partners below you (And you are referred by another account)

- Your first 2 partners below you - their payments into the POL FORCE go directly to your wallet (Minus the Dividend fee of 60 %). The 3rd partner that comes under your account at each level then auto reinvests for you! The payment comes to you but auto-pays for the level to be renewed by paying your upstream partner (At the same level)
- This renewal process resets your current partners connection (User C & D).... at this point you should upgrade to the next level, if not the next round of payments at this level will be redirected to your upstream partner!
- You will also receive these "upstream/overflow" payments from your downstream partners too when they renew (See payment flow from User H)
- There are no expiry dates on partners or levels!

Game Mechanics – POL FORCE X6

POL FORCE x6 has 9 levels like x3 ,each level is twice the price of the previous. But unlike x6 this system is 2 levels deep for your referred partners - giving 6 partners in total!

Your first 2 partners under x6 pay their payments (Minus the Dividend fee) direct to your current partner (User A).

The second level (Users E, F, G & H) are your payment level with Users E,F,G paying direct Matic into your wallet (Minus the dividend fee).

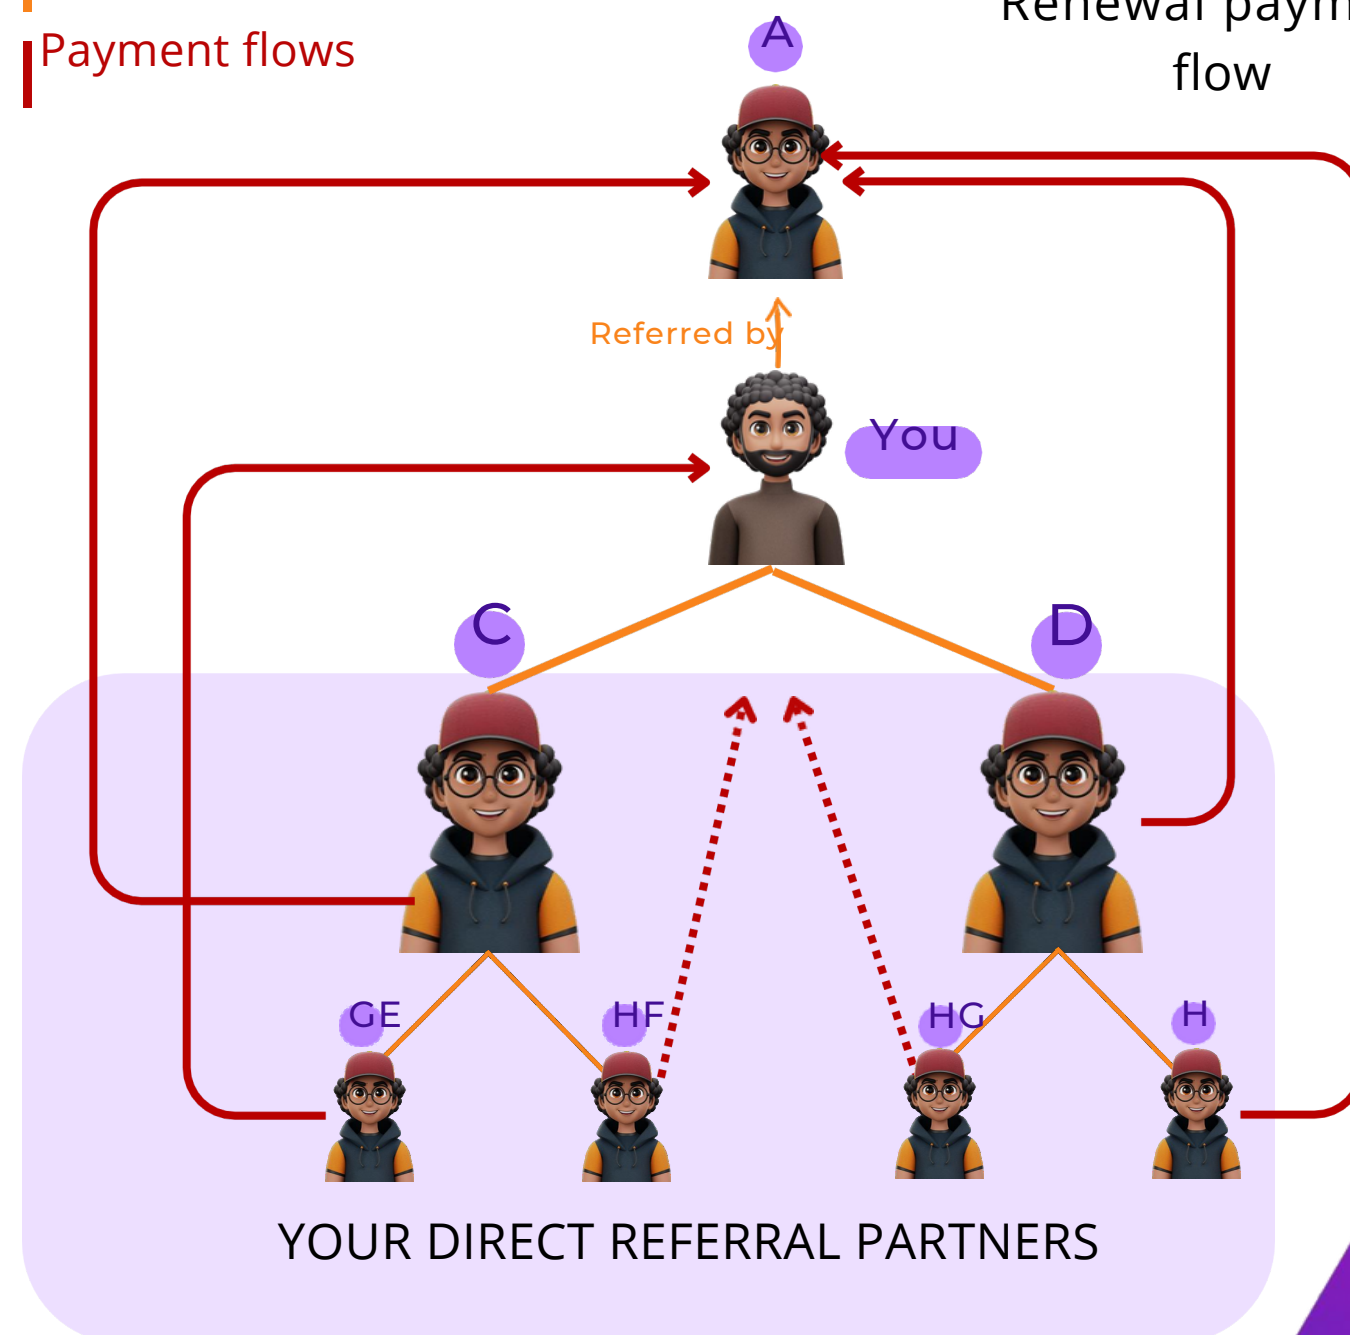

User H is the auto-reinvest payment - renewing the level for you... as with the x3 system this clears your referrals letting the system begin again but only if you upgrade to the next level ~ otherwise the next round of payments from your partners would go up your matrix to your partner!

Levels don't expire so filling your slots is not an issue!

Referral lines

Payment flows

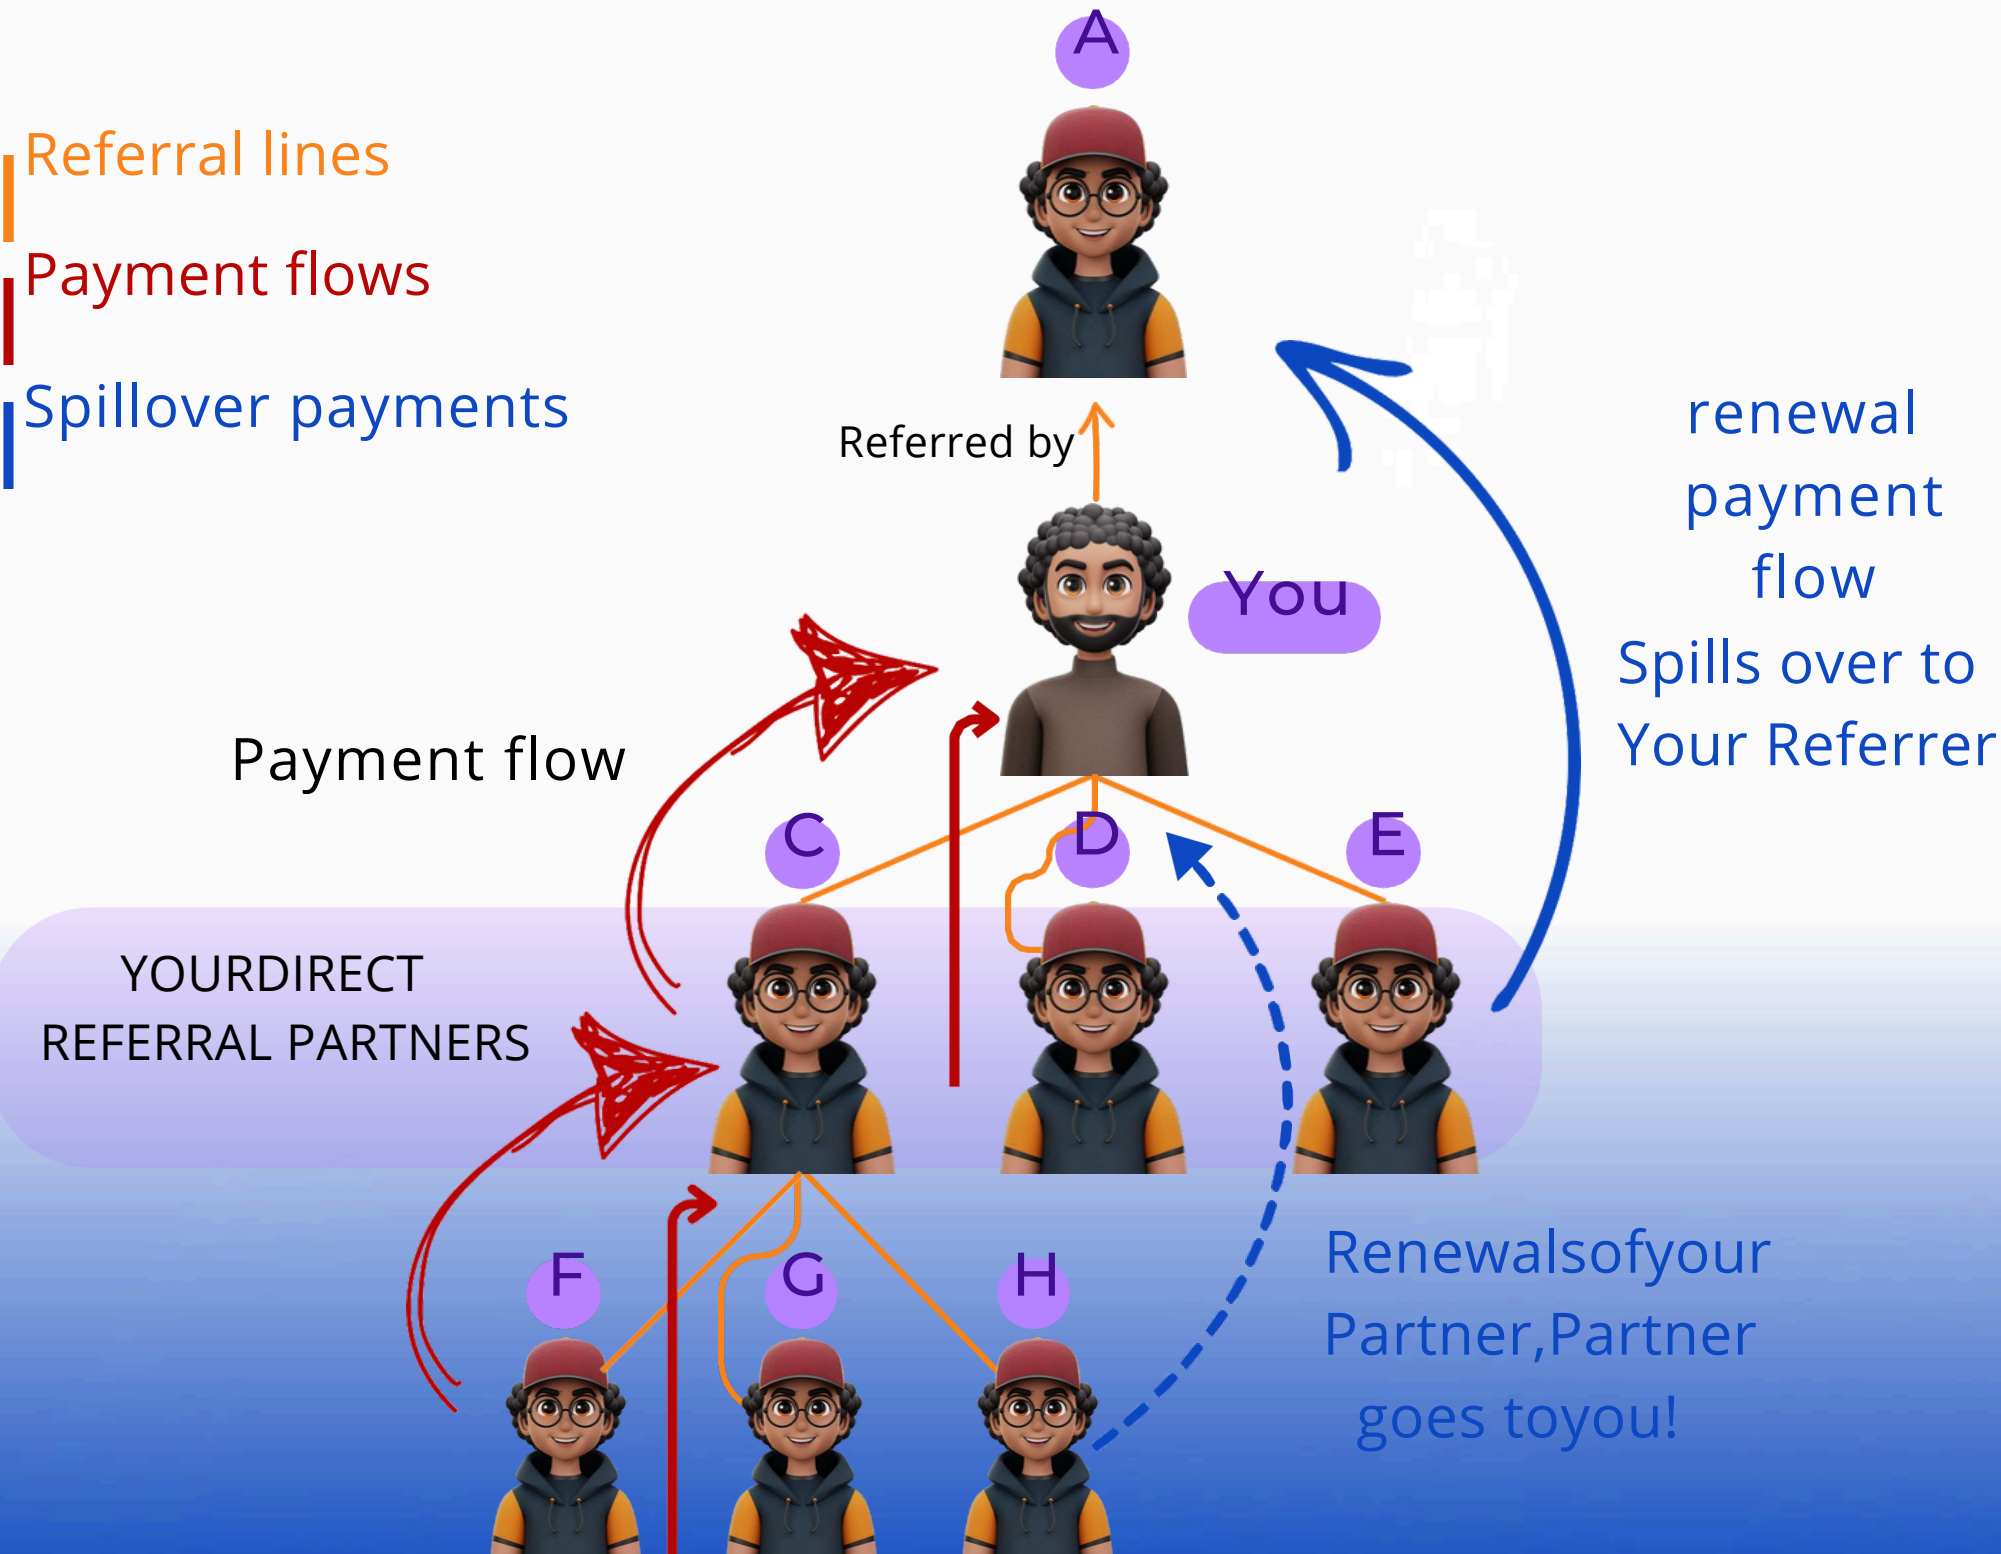

Renewal payment flow

Game Mechanics - Spillovers ~ Level Renewals

Spill over Payments are payments that you receive for users that are not directly invited/referred by you - they are in effect bonus payments!

- Referral lines
- Payment flows
- Spillover payments

The first type of Spillover payment available in the Level Renewal payments... When a Partner fills all of their slots (All 3 in x3 and all final 4 in x6)- the final slot is the auto-renewal payment.

The payment for this slot (Minus the 60% dividend fee) pays for the level to be renewed... to do this the payment goes up-line to the user's referrer (User A in the first example).

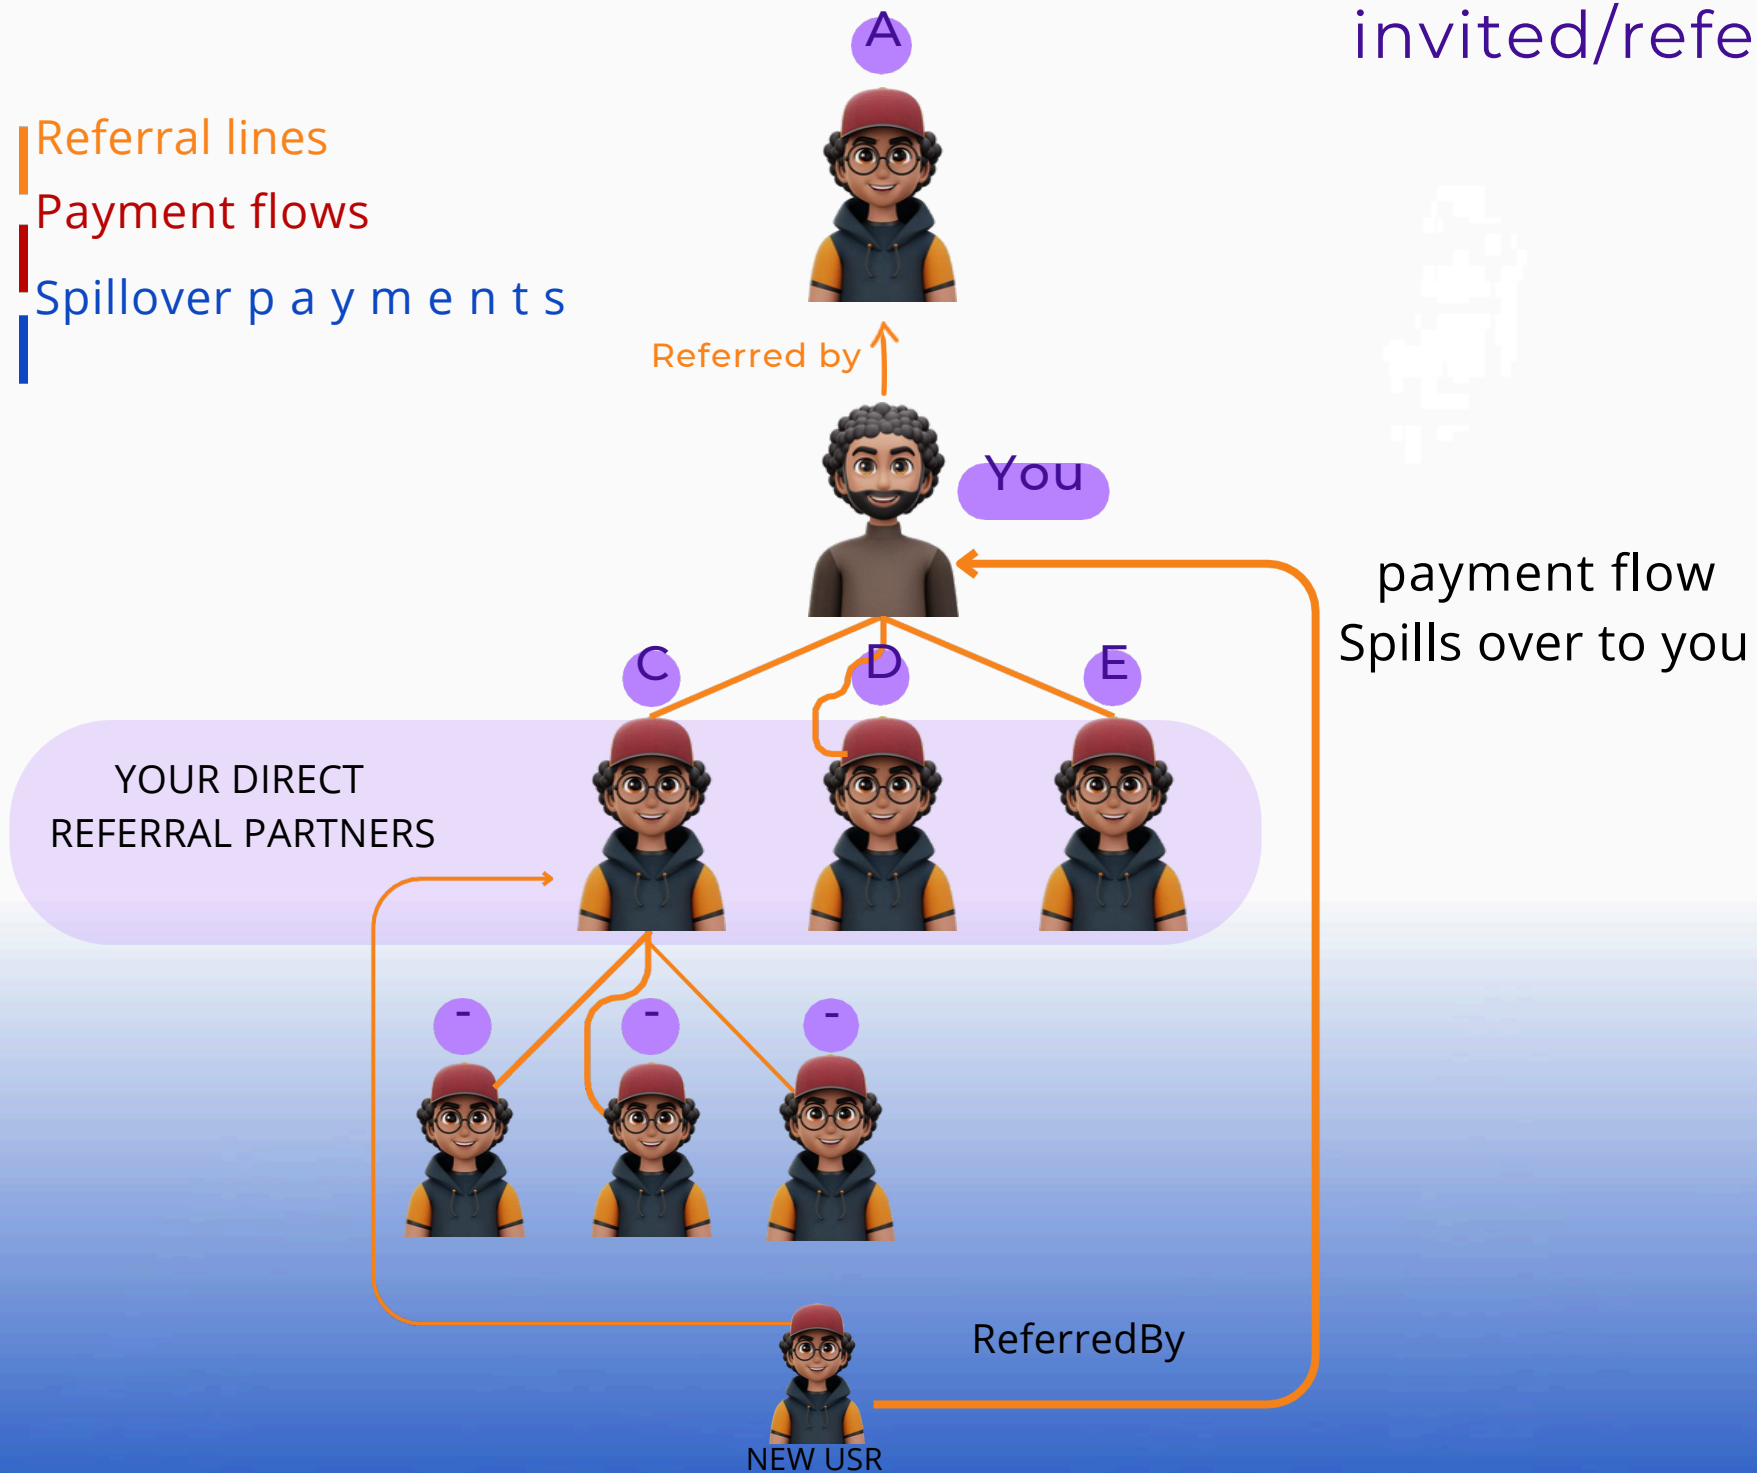

For you to earn these Spillover Payments you need your Partners to fill their slots...

For x3 that gives you 1 Spillover payment for each cycle! For x6 you can earn 2 Spillover payments for each cycle!

There is another type of also available in the Matrix... we'll cover this next.

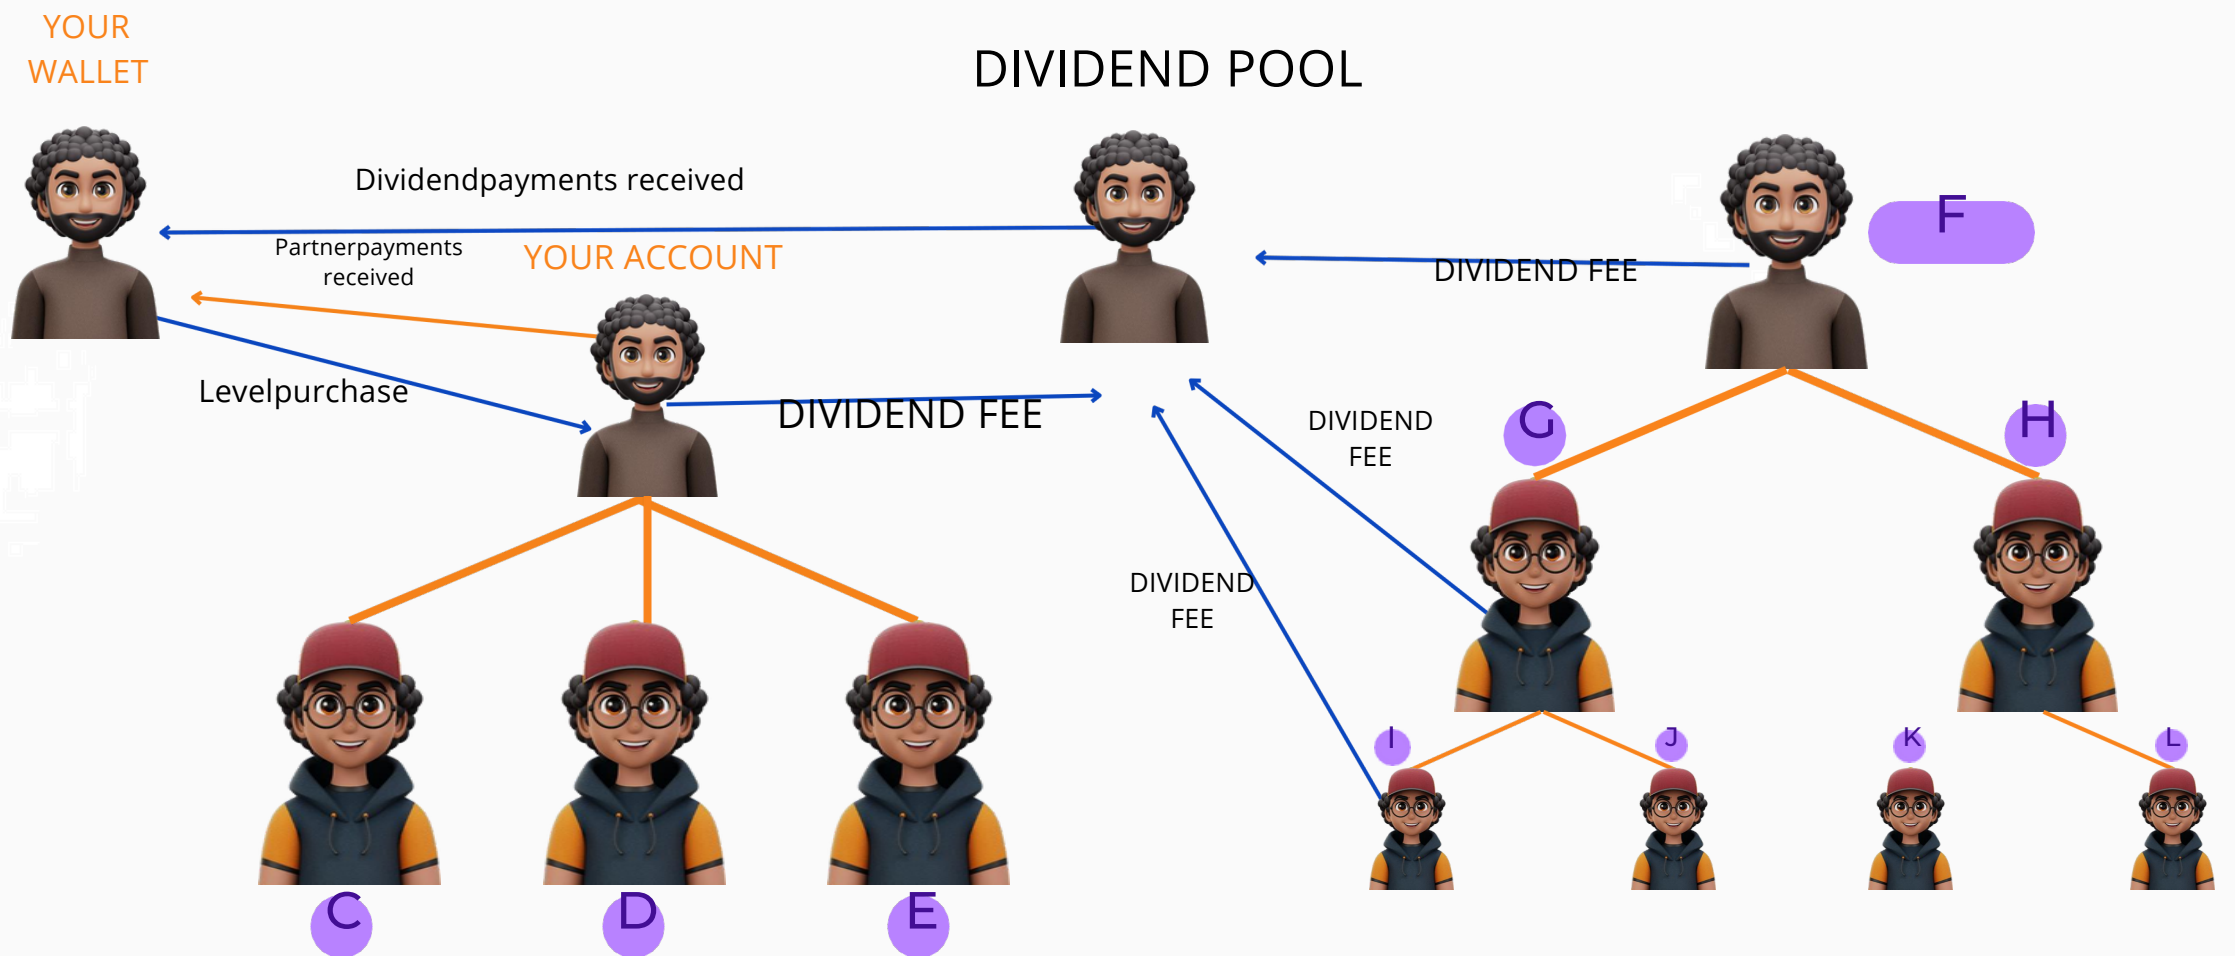

Game Mechanics - Spillovers ~ Level Upgrade

Spillover Payments are payments that you receive for users that are not directly invited/referred by you - They are in effect bonus payments!

- The third type of Spillover payment available in the Matrix is Level Block Spillovers!
- When one of your Partners has filled all of their slots in the current level - their Referrals slots are reset ready for another cycle.
- But - to enable this new cycle they must also be upgraded to the next level! If not this current level will be blocked for them and the next Partner they get will be redirected to you!
- The system searches up the Matrix of USER C, checking the current Referrer to see if that user is valid (YOUR ACCOUNT)... if you were also in the BLOCKED state for this level it would continue searching up the Matrix (USERA)

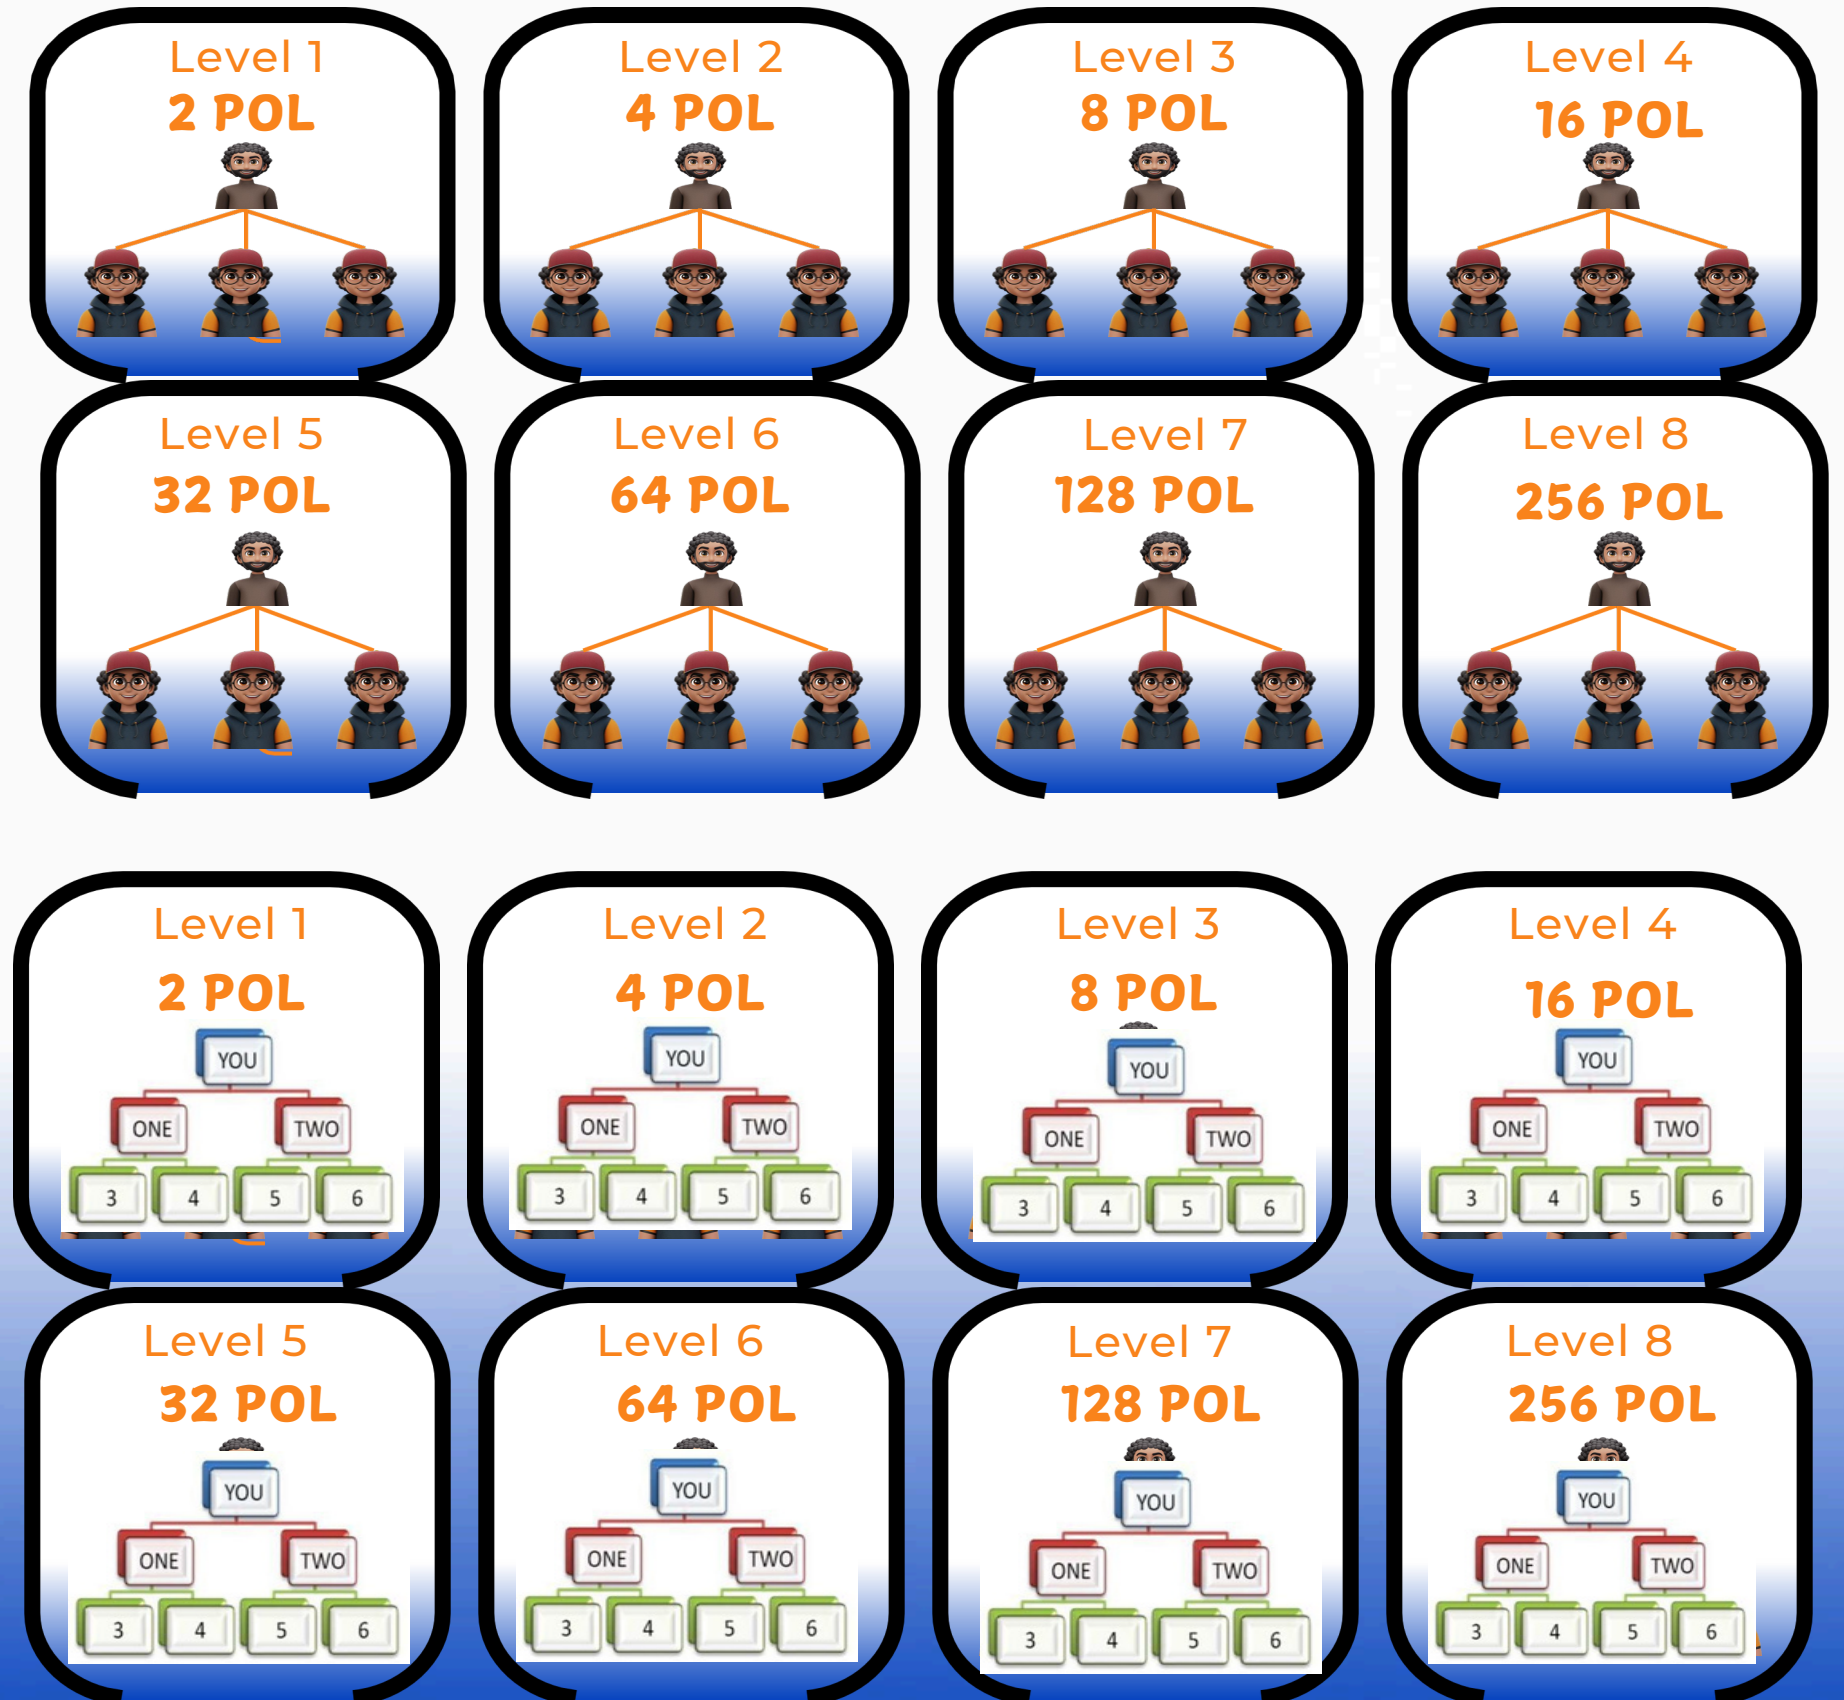

Game Mechanics - Dividends

What makes POL FORCE unique from other games is our lifetime dividends system! From every matrix payment a tiny 60% fee is charged ~ this is not a dev payment but paid in to the dividend pool which is distributed to every one who plays! You continue to earn even if your matrix remain side-but he bigger your MATRIX, the bigger your Referral Payout will be as it is distributed proportionally!

Game Mechanics - Game Levels

- There are 9 levels in both POL FORCE x3 & x6-
- Level priced at twice the previous (level 1 = 2 POL)
You can only buy each level in sequence (And independently for each x3 and x6).
- Upgrading through the levels also entitles you to receive multiple rounds of payments for the previous level!
- LEVEL 9 - 512 POL

THANK YOU
